

World Wire Cables (AUST) Pty Ltd

TAKE BACK AND RECYCLING TERMS & CONDITIONS

Customer may request that WWC pick up and dispose of end-of-life product(s), in which case Customer is responsible to pack according to WWC specifications and stage the product(s) for pick up.

Alternatively, Customer may request that WWC come on site to assist with packing by contacting their relevant Account Representatives or submitting a request via email.

Fees will apply for all Take Back Services requested by Customer.

A. CUSTOMER

Customer warrants, at the time of return, that the Returned Product(s) are free from hazardous materials introduced after the original delivery of the product(s) to the Customer that make the Returned Product(s) unsuitable for recycling by WWC.

Customer will remain solely liable for any costs, expenses, fees, duties, charges and any other obligations or liabilities for the Returned Product(s) prior to the Take Back.

B. WWC

WWC will pick up, transport and recycle Returned Product(s) in compliance with applicable law, and WWC will be responsible for any associated fees.

- All PVC materials will be recycled by Cryogrind (www.cryogrind.com.au)
- All copper materials will be recycled by each states' respective metal recycler.

World Wire Cables (AUST) Pty Ltd

It is not possible for WWC to identify and return Returned Product(s) shipped or made available for pickup in error by Customer. WWC is not responsible for any costs associated with returning the product(s).

WWC may, in its discretion, decline specific requests for Returned Product(s), where, for example, the products are damaged or contain hazardous materials introduced after original delivery of the Returned Product(s) that prevent lawful recycling.

WWC reserves the right to change or modify these terms and conditions at any time.
